Adobe Incorporated -36,0

Sector -15,6

*From 2015, B&Cie separates its investment recommendations into Core Holdings (higher organic growth potential, high free cash flow, ROCE in excess of the cost of capital and balance sheet efficiency throughout the cycle) and Satellite Recommendations, which do not meet the above criteria but are likely to outperform in the short-to-medium term.

Profile

Founded in 1982, Adobe is one of the world's largest and most diversified software companies, generating revenue of over \$15.78bn in FY 2021. Its products are ubiquitous in the internet age: graphic design, photo and video editing, animation, document design, printing, publishing, mobile applications and even e-commerce. The business is structured into three segments: Digital Media, Digital Experience and Publishing & Advertising. The group's flagship products are Photoshop, Acrobat, InDesign and Illustrator.

Market - competition - positions - barriers to entry

Adobe enjoys high levels of brand awareness and a reputation for high-quality creative software. Now a key player among amateurs and professionals alike across all industries, Adobe has succeeded in dominating the market after switching to a subscription and Software as a service (SaaS) model from 2013 onwards. To maintain its leading position, Adobe must adapt as technology increasingly shifts towards virtual reality and artificial intelligence.

Investment case

- Adobe is a trailblazer in the adoption of cloud solutions: the launch of Adobe Creative Cloud in 2012 transformed the business, shifting the group to a business model based on monthly subscriptions and offering excellent visibility on revenue that is, by nature, recurring. At the end of fiscal year 2021, 90% of the group's revenue was derived from subscriptions, enabling it to generate a 2021 free cash flow margin of 42%.
- To help meet the demands of an increasingly digital economy, Adobe is structured around three segments: Digital Media, Digital Experience and Publishing & Advertising. Digital Media (73% of FY 2021 revenue) consists of Creative Cloud and Acrobat & Document Cloud. Creative Cloud spans a range of software (Photoshop, Lightroom, Illustrator, etc.) in the form of Software as a service (SaaS) via the cloud, serving a very broad customer base ranging from students to marketing and business professionals. Acrobat & Document Cloud (Acrobat, Scan, Sign) is an SaaS for creating documents and digital signatures. Digital Experience (24.5% of revenue) encompasses a range of solutions focused on analytics for marketing and business. Publishing & Advertising (2.5% of revenue) is focused on meeting the publishing and advertising needs of technical writing and commercial publishing teams.
- Lastly, Adobe operates in fast-growing markets: estimates put its total addressable market in 2023 at \$128bn, broken down into \$31bn for Creative Cloud, \$13bn for Document Cloud and \$84bn for Experience Cloud. Given the high usage levels of Adobe's products (available for use on all sorts of screens) and the huge quantities of associated data, the business can continue to gain market share and extend its offering into automated learning via Adobe Sensei. Finally, Adobe is prioritising strategic partnerships, in particular with Microsoft for electronic signatures, which have met with great success since the onset of the public health crisis.
- Adobe has \$5.8bn in cash and short-term investments on its balance sheet, compared with \$4.1bn of debt.

ESG - risks and key points

- Notable key risks include fierce competition in the group's various markets and technological change: creative apps (Apple, Microsoft, Autodesk and social media), advertising (Google, Facebook) and documents (Google, Microsoft, Dropbox, DocuSign). However, Adobe is managing to keep its customers happy and hold on to its position as market benchmark.
- The company has a very strong management team and the risk of material financial impacts linked to ESG factors is low thanks to its low exposure and sound management of ESG issues.

Valuation** in USD

Current price	Value Bordier Scenario
368	459

Our scenario assumes US 10-year yields of 3.50%, sales growth averaging 14 to 7% a year out to 2032 and growth in the EBIT margin stabilising at around 48% by 2025.

** The theoretical value reflects the company's business model, our baseline growth and profit scenario and market data, exogenous to the company (risk-free rate and equity risk premium). It does not in itself constitute a target price.

Glossary

ESG Risk Score

At B&Cie, we take particular care to ensure that the companies in which we recommend investing are sustainable. Accordingly, our selection process takes account of risks relating to environmental, social and governance (ESG) issues. This approach is underpinned by research from Sustainalytics, the global leader in ESG and corporate governance analysis, whose methodology aims to identify major controversies and risks and assess a company's ESG risks relative to both its sector and the investment universe as a whole. The corresponding score is expressed as a percentile: the lower the overall risk score, the lower the risk within the investment universe.

b-Digital, b-Transition & b-Well

Over and above the conventional geographical and sectoral approaches to asset management, at B&Cie we believe the world of tomorrow is being shaped by structural trends. We have identified three main megatrends: ongoing digital globalisation of the economy; economic transition, particularly in the energy sector; and the quest for wellness. We believe selecting and investing in companies that play an active role in these transformations should lead to more resilient portfolios that generate higher long-term returns. Our investment recommendations in the digital globalisation space are labelled "b-Digital", those in the economic transition space "b-Transition" and those in the wellness space "b-Well". A given recommendation may fall under more than one theme, in which case it will carry the relevant matching labels.
